

## Content

Introduction to the requirements of the International Ship and Port Facility Security (ISPS) Code for port installations.

The objective of the seminar is to introduce future Port Facility Security Officers (PFSO) to the obligations and responsibilities resulting from the ISPS Code and

Theoretical instruction and practical examples will show the participants, how the requirements of Port Security can be met. The participants will gain the required knowledge to

- prepare a Port Facility Security Plan, to adapt such a plan and to conduct the implementation
- assess accurately risks, dangers and weak points
- perform regular inspections
- develop a deep understanding about Port Security Systems

## Target Group

This course has been designed for persons that will be appointed as PFSO and other personnel in port and similar organisations that will be engaged in security activities.

The participants shall have a working knowledge of the English language and working experience on ships or in port.

## Organiser

The seminar will be executed by HPTI Hamburg Port Training Institute GmbH in cooperation with the Germanischer Lloyd (GL). HPTI is a specialised manpower development and training organisation, working world-wide in the fields of ports,

Germanischer Lloyd has been designated by several important flag states as Recognised Security Organisation (RSO), enabling it to perform certain security activities on their behalf.

pooled experience to conduct Security Investigations and to prepare Port Facility Security Plans in the port industry for clients world-wide.

## Training Experts

To conduct the training courses, HPTI has assembled a pool of experienced trainers from port terminals, cargo handling firms, security entities, shipping companies and public administration organisations.
